Storytelling Benefits

Easy to follow and understand

Engaging

Time-saving

3 Steps

Research

**Audience, content &
key message**

The Audience

- **Who** is the audience?
- What is the **experience** level?
- What **actions** do they want to take and why?
- What's the **process**?
- How is the report **used**?

Knowing the **audience** and their
actions and processes helps
you to add **meaning** to the
visuals.

What's the message

CONTEXT

INFORMATION

ACTIONS TO
TAKE

3 Examples

- 
- Each **year** we share **information** with the **whole company** what our **key** sales results are (profit, costs, margin, difference LY).
 - As **MT** we **evaluate monthly** the **key** sales results, the **performance** of our account managers (€ vs target) and the **best/worst products**.
 - Our **data analysts** daily dig through all the data to **investigate** hidden **trends and anomalies**.

Create

**Storyboard, Templates &
Visuals**

Storyboard & Mock-ups

Gather all the information

- Sticky Notes (easy to rearrange)

Translate pieces to design

- Each piece tells a part of the story
- Check your story

Templates

- Uniformity
- User knows what to expect
- Focus on the insights, not on handling the tool.

Using a Grid

- Organized
- Create it in Power BI
- Can **help** with discussing layout

The perfect visual

I just want an idea of what's happening.

I like tables but my coworker prefers visuals.

Sales by Territory

Tell the Story

Meaningful (Sub)titles

- Context
- Guidance
- The audience does not need to analyze the data

Adding Context

Deliver

Evaluate & Test

IT'S PERFECT!

Continuous process

- **Involve** the audience early on
- **Don't stop directly** after implementation
- **Evaluate** with the actual audience

What if it doesn't work?

- Don't panic
- Avoid adding unnecessary data, filters, or options.
- Provide guidance.
